EDUCATION

Northeastern University — Boston, MA

Master of Science in Computer Science (MSCS)

Sep 2026 - May 2028

Sri Krishna College of Engineering and Technology — Tamil Nadu, India

Bachelor of Technology in Information Technology

Oct 2022 – March 2026

TECHNICAL SKILLS

- Languages: Java, Python, SQL, C++, JavaScript (Node.js, React.js), HTML/CSS.
- Frameworks & Libraries: Spring Boot, React.js, Express.js, Material UI, Chart.js, JUnit
- Cloud & DevOps: AWS (S3, EC2, Lambda, API Gateway, IAM), Docker, Kubernetes (Basic), CI/CD (GitHub Actions)
- Databases & Tools: MySQL, PostgreSQL, MongoDB, Redis, Apache Kafka, REST APIs, Git
- Core Concepts: Data Structures & Algorithms, Object-Oriented Programming (OOP), System Design, Microservices, OS Concepts

TECHNICAL EXPERIENCE

Accenture — Bangalore | Software Engineering Intern

May - June 2025

- Built a serverless employee onboarding workflow using AWS Lambda, API Gateway, and S3, reducing manual entry by 80%.
- Automated data processing and backend integrations, improving onboarding efficiency and reducing operational latency.

PROJECTS

Event-Driven Double-Entry Payment Ledger | Java 17, Spring Boot, MySQL, React.js, Docker Live Demo

- Engineered a concurrent double-entry ledger using SELECT FOR UPDATE and JPA @Version, preventing race conditions and account overdraws.
- Implemented database-enforced idempotency and an append-only ledger with the Transactional Outbox pattern for reliable payment processing.
- Built a React dashboard for account management, balance tracking, and debit/credit transaction visualization.

Distributed Event-Driven Order Processing System | Spring Boot, Docker, Kafka, Redis

- Built an event-driven microservices system using Kafka for asynchronous communication across Auth, Order, Inventory, and Notification services.
- Implemented JWT authentication, Redis caching, independent service databases, and Docker Compose for containerized deployment.

Health & Wellness Analytics Dashboard | React.js, Spring Boot, PostgreSQL, Docker

- Developed Spring Boot REST APIs integrated with the Edamam Nutrition API, implementing server-side caching to reduce response latency by 40%.
- Built a React dashboard with Material UI and Chart.js for food logging, nutritional analytics, and PostgreSQL-backed authentication.
